

# Senior DevOps Engineer

*Incubators Global, Chennai*

This is an exciting opportunity for an experienced DevOps Engineer to take ownership of their own DevOps team and create an optimal workflow from scratch in an innovative new company to develop a cloud based enterprise product. Preference will be given to candidates with a broad skillset and a willingness to learn new technologies.

## **Requirements:**

- Ability to automate tasks by scripting and using automation tools
- Comfortable working with SQL and NoSQL database systems
- Familiarity with setting up, using and managing Linux (preferably Ubuntu) environments
- Building for and deploying to multiple VPC/IaaS environments
- Working with and managing cluster environments
- The ability to build and manage a team

## **Education/Experience:**

- Experience working with continuous integration servers like Hudson and Jenkins
- Comfortable working with Git/Github
- Automation, integration and monitoring of Configuration Management tools like puppet and chef
- Python, ruby and JavaScript scripting experience
- Powershell scripting
- Defining and automating Docker Containers implementation
- Containers cluster management tool like Kubernetes
- Installing, deploying and managing NoSQL databases like MongoDB, Couchbase, Redis in cluster environment
- Building and deploying VMs on AWS, Azure, OpenStack, GCE
- Backup, archival, and validation procedures
- Setup and administered firewalls
- SQL queries experience
- Installing, implementing and managing memcache
- Managing and scheduling jobs on Hadoop
- Pig and/or hive experience
